MODELING OF LNAPL SPREADING AND MIGRATION ON THE WATER TABLE BENEATH AN OIL REFINERY

A title consisting of a maximum of 10 words in bold capital letters (18 pt. font) and centered

Ansari, Y. ¹, Habibagahi, G. ²,

1. Ain Shams University, Faculty of Engineering, Irrigation and Hydraulics Dept.

2. Director of the Drainage.....

The authors names (14 pt. font) followed by their affiliations and present addresses should be centered under the title.

Key Words (12 pt. font) containing a maximum of six key words indicating the area of the paper.

Abstract

An abstract of not more than 250 words (14 pt. font) in the same language of the text to give the summary of the main contents of the paper. The abstract should not include any references, and not exceeding the first page in length

1. INTRODUCTION

Main headings should be uppercase Bold(font 14). Subheading with title case letters (font 14) Bold

2.BASIC PRINCIPLES

2.1 System Under Study

The Body text is Times New Roman (size 12 pt) with single spacing. One spacing is left between paragraphs and above headings and subheading.

Figures should be centered in the page with its title under the figure (size 11 pt)

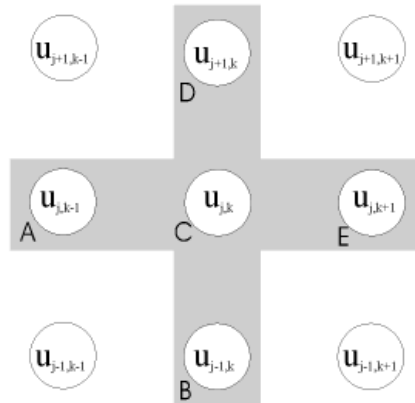

Figure (1) Five-point stencil

Tables should be centered in the page with its title above the table

Table (1) Volume, area and thickness of LNAPL mounds

Mound No.	Estimated volume of LNAPL (m ³)	Area of mound (m ²)	Maximum apparent thickness (mm)
1	10311	187651	1130
2	403.34	110885	50
