Armed Forces Engineering Authority training in the New Capital, (site visits) August 2021

Smart & Future Cities Laboratory (SFCL, ASU-FoE), offered digital fabrication workshop and competition opportunities in the midyear vacation, February 2022.

Info-Sessions

Info-sessions were conducted by REDCON for offices & commercial centers, and AluNile.

AluNile info-session at Faculty campus, 20th December 2021

REDCON info-session, Golden Gate project location, fifth settlement, 4th November 2021

First

Training Cycle on the Information Management System and Training Handbook Issuing

Training cycle was modified on the Information Management System (IMS), and a training handbook was issued accordingly clarifying new training cycle and types, in addition to all programs training specifications to draw clear track for selected training opportunities.

PRACTICAL FIELD TRAINING HANDBOOK

Practical field training handbook is on IMS (dashboard_my archive_training documents), authorized by the faculty council 20th September 2021

the ACADEMIC Activity: Student Chapter

Boosting for more student chapters establishment was introduced in Faculty council meeting (Sep. 2021) to encourage academic departments to start forming initiative teams under supervision of an academic advisor for each (staff member in the same discipline). This initiative was guided by promotion video: [V2 - STUDENT CHAPTER.mp4](#)

Academic Advising Workshop: Training System & Psycho-social Role

A workshop was held on Thursday, 10th March, 2022 (online on Microsoft Teams), to introduce new training system cycle, describing how to add previous missed training accomplished by students, and activating the psycho-social role of academic advisors (as a part of the wellness program).

Academic Advising Workshop: Training System & Psycho-social Role

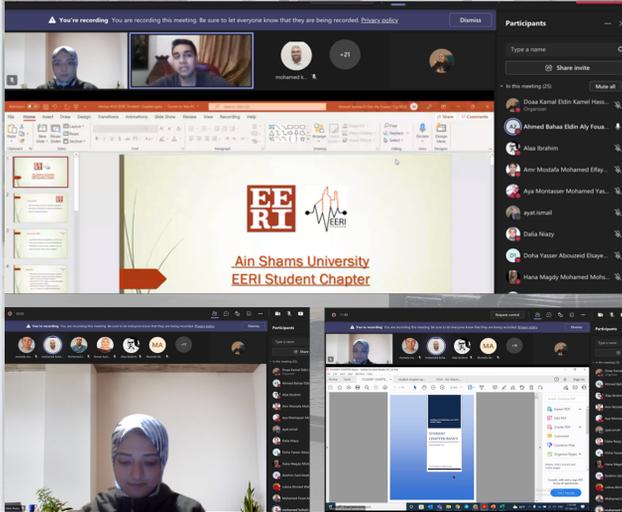

The Status Quo

There are three pre-established student chapters all under the umbrella of Structural Engineering Department; they are Earthquake Engineering Research Institute (EERI), American Society for Civil Engineers (ASCE), and the American Concrete Institute (ACI), the latter is also related to Irrigation of Hydraulics Engineering Department.

Meetings were held via Microsoft Teams among different starting groups crossing many disciplines to encourage and assist each others to establish their chapters.

The latest established student chapter is with the American Institute of Architecture Students (AIAS). It is established by students in different architectural programs.

Preparation meetings of the groups willing to establish new student chapters
